The hearing revolution continues

“ When Starkey introduced the world’s first multi-purpose Healthable® hearing aid with embedded sensors and artificial intelligence, we redefined the future of hearing aids. But we’re just getting started. We’ll continue to evolve our products from traditional hearing aids to smart devices that augment human senses, enhance health and wellness, amplify human intelligence, and enable super-human abilities.”

**Achin Bhowmik, Ph.D.**  
Chief Technology Officer and  
Executive Vice President of
